

LEADING THE WAY IN SMARTER CENTRAL LAB TESTING

HELPING YOU OPTIMIZE YOUR NEXT CLINICAL TRIAL PROGRAM

Each clinical trial program must be customized to address unique specifications and challenges. By partnering with ACM Global Laboratories, our scientific experts, project managers, and other professionals are available to help you obtain the information needed to make data-driven decisions about your clinical trials program from inception to completion.

Leverage Our Experience to Support Your Goals

ACM Global is a recognized leader in global clinical trials testing. Through wholly-owned facilities or our network of partner labs, we support clinical trials in more than 65 countries.

Since 1975, ACM has remained steadfast in our mission to deliver actionable clinical insights that lead to therapies and treatments that provide health, healing, and hope to patients around the world. We are committed to forming research partnerships built on technical know-how, flexibility, and a focus on customer service. With a global network of nearly 600 laboratory professionals, we provide the skill and bandwidth to deliver central laboratory services spanning several therapeutic areas.

Comprehensive Central Lab Services

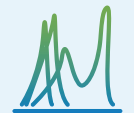

ACM Global offers a wide range of central lab services that support regulatory submissions, preclinical studies, and clinical trials. Our company tailors services to facilitate the specific goals of your program.
